Overview

A Milestone Certified Integration Technician (MCIT) should have the ability to install and configure multi-server, medium-complexity video surveillance systems.

For Milestone to certify you have this knowledge and these skills, you must pass an MCIT assessment.

The MCIT assessment includes test items associated with any of the following tasks, concepts, and product features:

- Identify system components
- Configure the network and server
- Install Milestone VMS components
- Configure recording and storage settings
- Add devices
- Configure hardware and devices
- Create rules
- Determine storage solutions
- Configure roles and users
- Define alarms
- System Options, System Monitoring, and Log Files
- Configure the Milestone Mobile server
- Set up the Smart Client

Before you take the MCIT assessment, ensure that you have the knowledge and skills to perform all tasks and steps listed above by consulting the list of resources in this document.

You are allowed to access any of these resources during the test. However, you have only two hours to complete the test, so it is recommended that you become familiar with the content in the following list before taking the certification.

eLearning

Completing eLearning courses specific to this role will enhance your ability as an Integration Engineer and knowledge to complete the certification.

To get started:

1. On Milestone Learning, access the [Role-Specific Learning Paths](#) webpage.
2. Scroll down to the **Integration Technician** section and select **View Courses**.
3. To complete a course, select **Begin Course** at the bottom right corner of the course information box.

Coursework

For additional help, take the instructor-led Milestone Technical Configuration 1 training class.

Access upcoming Milestone Technical Configuration 1 training classes by following the link:

<https://learn.milestonesys.com/scheduledclasses>

To locate your class on the Upcoming Classes webpage:

1. In the Course drop-down list, select **Milestone Technical Configuration 1**.
2. In the Language drop-down list, select **your desired language**.
3. In the Country drop-down list, select **your desired country**.
